CURRENT MANUAL SUPPLIER PRICE QUOTE PROCESS

MANUAL SUPPLIER PRICE QUOTE PROCESS – OVERVIEW

Initiation & Coordination

Supplier Follow-Ups

Quote Analysis

Schedule Manager Review

Documentation & Archiving

Quarterly Process Start

The request for price quotes is initiated each quarter to gather supplier pricing information.

Manual Coordination

Timely communication and coordination among procurement analysts are essential.

Manual Follow-Ups

Manual follow-ups with suppliers are essential to maintain timely communication and progress.

Query Management Challenges

Handling queries and clarifications along with follow-ups often leads to delays and increases team workload.

Quote Analysis Process

Human review of received quotes to ensure quality of material received.

Manual Evaluation

Supplier selection relies on manual assessment among procurement analysts.

Human Judgment Role

Human expertise reviews and signs off the final analysis.

Scheduling Challenges

Manual coordinating schedules among multiple managers causes delays in the proposal review process.

Importance of Documentation

Documenting meetings is essential for maintaining accurate records.

Archiving Proposals

Archiving proposals preserves important decisions and supports future reference and audits.

Manual Workload Challenges

Manual documentation and archiving increase workload.

FLOWCHART OF NEW AUTOMATED PROCESS

KEY PAIN POINTS AND INEFFICIENCIES

Supplier Delays

Delays occur frequently due to the need to chase suppliers for information and deliveries.

Manual Analysis

Manual data analysis consumes excessive time and increases the risk of errors.

Meeting Coordination Challenges

Scheduling and coordinating meetings is difficult and causes project slowdowns.

Documentation and Archiving

Documentation and archival requirements burden the team and reduce overall efficiency.

AUTOMATING THE PROCESS WITH AGENTIC AI WORKFLOWS

FLOWCHART OF NEW AUTOMATED PROCESS

Automated Request for Quote Initiation and Follow-up

Streamlined Supplier Quote Review and Best Offer Analysis

Automated Management Meeting Scheduling and Decision Archival

AUTOMATED WORKFLOW ARCHITECTURE AND KEY FEATURES

AI-driven Task Management

AI enhances task management by automating scheduling and prioritization, increasing operational efficiency and accuracy.

Supplier Communication Integration

Automated communication streamlines supplier interactions, improving coordination and reducing delays.

Data Processing Efficiency

AI-powered data and archiving processing accelerates workflows and minimizes manual errors, ensuring data consistency.

HUMAN-IN-THE-LOOP RESPONSIBILITIES

Critical Review Oversight

Procurement analyst or manager review of supplier's responded quotes meeting the company's requirement

Decision-Making Role

Procurement manager review of proposed best offer and sign-off

Additional management meeting to discuss the proposal and record final decision

Quality Control Assurance

Final decision meeting minutes is reviewed by procurement manager before signed off for archiving

IMPACT, BENEFITS, AND NEXT STEPS

TIME AND RESOURCE SAVINGS

Reduced Follow-Up Time

Minimizing time spent on follow-ups allows focus on core tasks and enhances work efficiency.

Decreased Manual Processing

Automation of manual tasks saves resources and accelerates operations.

Improved Productivity

Freed resources can be redirected to higher-value activities, boosting overall productivity.

QUALITY CONTROL WITH HUMAN CHECKPOINTS

Human Oversight Importance

Human checkpoints provide essential quality control to complement automated systems effectively.

Balancing Automation and Expertise

Automation supports tasks while human expertise guides and verifies outputs for accuracy.

POTENTIAL FOR FURTHER ADOPTION

Scaling and Expansion

Processes of similar nature, e.g., financial reporting request, review, & approval, or sales pitching, follow-up, transacting & approval, can adopt similar setup and scale or expand the demo to production use

Alternative AI-tool Exploration

N8n is one of the AI workflow platforms used in the demo. Other AI vendor software also can be explored to deliver similar capability, depending your budget and expertise
